

Structured Solutions. Committed Growth

AMIYA

THE PIONEER SINCE 1956

FOUR DECADES OF DEDICATION & EXCELLENCE.

Today, structural concept, analysis and design have undergone myriad changes based on new ideas on loads, strengths and utilities. With industrial growth, awareness of economy and safety, too, has increased among entrepreneurs and individuals. In this scenario, our philosophy of constant innovation and quest for product upgradation have always borne us fruit.

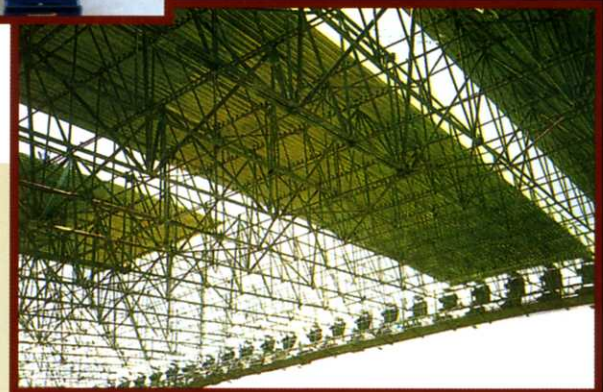

As a multi-product organisation run by dynamic professionals, Amiya is geared up for the future. With pride and confidence.

THE LEADER

The Amiya Group has specialised in prefabricated steel structures both for industrial / non-industrial applications. Our own standard dimensions of prefabricated parts for customers had been one of our earlier innovations. AMIYA understands your need-based requirements and provides the appropriate solution- from concept to commissioning design, manufacturing under controlled conditions, quality supervision and erection with the latest equipment.

LOOKING AHEAD...

Our well-diversified product range includes industrial sheds, warehouses, stadia, auditoria, space frame structures, petrol station canopies, bridges and pre-fabricated housing etc., each tailor-made to suit your exact needs. Apart from our project activities, we also have a standard product line - Steel Scaffolding and Accessories for the construction industry.

Stringent quality control and innovative Research & Development have helped us garner the leadership position in our sphere. Well equipped factories with increased production capacity and an efficient administrative system have laid the foundations on which we have started to build for the future. Today we are confident of providing you with a viable solution to your structural requirements, however complicated or fascinating it may be.

Glimpses of Amiya Projects

Factory & Ware house

CWC, Junagarh

FCI, Rangpoo

Videocon, Kolkata

HLL Fertilizer, Haldia

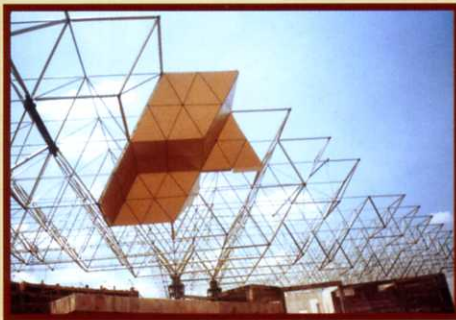

Bengal Unitech, New Town, Kolkata

AAI Hangar, Kolkata

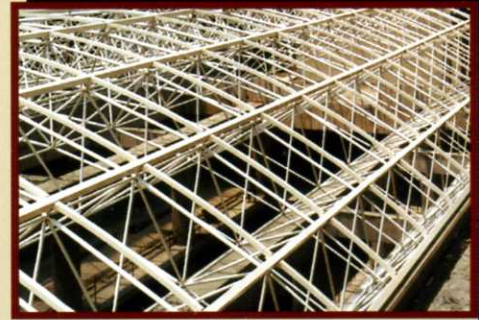

Space Frame

ITPO, Bangalore
